

Lake Erie Watershed Discovery WebEx
Sessions for the week of May 19, 2014

Background

FEMA is focused on updating the floodplain maps for coastal regions throughout the United States, and this includes all five of the Great Lakes. The Lake Erie Watershed Discovery project is the beginning of an interactive process that results in a watershed-wide assessment of

existing flood hazard mapping needs, existing information useful in updating the Flood Insurance Rate Maps (FIRMs) and ultimate recommendations for the development of updated Risk Mapping, Assessment and Planning (Risk MAP) and Flood Insurance Rate Map products.

This interactive WebEx will introduce the RAMPP planning team, provide a background to the Discovery process, and begin to document flood mapping needs for participating communities. Using an online survey (<https://www.surveymonkey.com/s/LakeErieDiscovery>), the planning team will capture additional local floodplain and hazard risk data needs and request feedback from the municipalities, Counties, and regional groups within the project area.

The purpose of the Discovery meeting(s) is to review any information previously provided by communities, state and regional agencies, and local stakeholders, discuss your community’s floodplains and floodplain management activities, mitigation plans and projects and flood risk concerns, and to provide additional feedback for FEMA to consider when developing Risk MAP products for your community, including the potential development of new Flood Insurance Rate Maps (FIRMs) where needed.

Agenda

Welcome & Introduction to Discovery Process	Robyn Boyd / Andrew Martin (RAMPP)
Coastal Data and Collection Progress	Jeff Gangai / Emily Dhingra RAMPP)
Data Collection Survey Identification of Flood Risk Concerns via ArcMap	Rachael Herman (RAMPP)

Community Survey

Prior to the webinar, please click on the following link to complete the Data Discovery survey for your community:

<https://www.surveymonkey.com/s/LakeErieDiscovery>

Note: If you are unable to complete the survey in one sitting, complete as much as you can and exit the survey. When you are able to finish, use the same computer to pick up where you left off. SurveyMonkey will remember your computer.
